

## HOW TO SET YOUR PERSONAL COMBINATION

Your new resettable combination padlock is preset at the factory to unlock at 0-0-0-0. Use the following steps to set your personal combination.

**Step 1:** Set dials to combination 0-0-0-0 and pull out shackle.

**Step 2:** Turn shackle 90 degrees, aligning the notch to the other slot and press down as far as it will go.

**Step 3:** While holding the shackle down, set dials to your own combination.

**Step 4:** Release shackle and return to regular position. Your new lock will now open to your personal combination.

Record your combination in a safe and accessible place for future reference.
